D O W N H I L L

The Mondraker bike that has been sprayed with champagne more times. As a result of the countless successes from our MS Mondraker official Team, it has conquered World Cups, World Championships, European and National races. The Summum is not only the choice of champions like the MS stars Laurie Greenland, Brook MacDonald and Mike Jones and all the co-Factory Team, but it has also proved to be the fastest bike on earth after Markus Stoëckl achieved a new speed record.

S U P E R E N D U R O

Perhaps our most playful bike. The new 2019 Dune range has now increased its travel up to 170 mm front and rear as well as adopted metric sized shocks with Trunnion mount that provide more absorption, suppleness and stiffness to the rear end.

Best choice for Enduro Racing , it can also be the perfect bike to enjoy at Bike Parks due to its remarkable liveliness with 27.5 wheels.

THE BIKE. Our flagship model introduces a completely new sibling with 29-inch wheels. Far from expected with 29ers, it even improves all Mondraker key features: agile and stable thanks to our Forward Geometry concept now complemented with short-offset forks, more responsive kinematics with optimized Zero Suspension System and 150 mm travel, and exclusive Stealth Air Carbon manufacturing process.

Surely our most efficient and fastest bike within the range.

X C R A C E

Podium Carbon represents how Mondraker understands the highest level of Cross Country Racing. The favorite bike for our Primaflor-Mondraker UCI Elite XC team that allows our riders to fight for every World Cup race. Maybe, the best performance bike in the market able to combine high efficiency together with a unique look.

The development of Stealth Air Carbon technology is able to manufacture a sub-900 g frame, ensuring that Podium translates every pedal stroke into direct forward movement. At the same time, the patented IST integrated stem technology provides superior precision and stiffness to the bike's front end.

X C P R O

First step into XC racing; the new Chrono Carbon is born following the traces of the current Podium Carbon, preserving its high performance.

With a frame weight of just 1.150 g, it takes advantage of our XC Forward Geometry concept, Stealth Carbon technology and FlatStays seat stays for the most compliant ride, giving the early XC-racer a bike with improved handling and stability.

Our Sport range reveals a category of sportive mountain bikes developed with the same inspiration than our top models. They are the perfect option for the everyday rider that wants to stay fit on the bike. Featuring the Avant Geometry makes you feel really confident from the first moment, no matter if you are on the trail or in the mountain. The Phase and Neva surely will provide a lot of fun, great handling and of course a great design.

Kids want action and our kids bikes offer exactly that, combined with a huge fun factor and cool design. From the Leader models with different wheel sizes to the full suspension Factors, a.k.a. "mini Foxy"; all of them are carefully developed keeping in mind, what the youngest riders really want.

Our award winning Factor models are truly unique kids bikes. The incredible performance is the result of many details, and every detail on that bike is thought and made for the need of kids. It is super lightweight and packed with features allowing the young rider to get into the mountainbike sport with a maximum of confidence and action. Impossible to get bored.

We put everything we know about performance Mountainbikes into our e-MTB's. That's why our Crafty and Level bikes have no room for compromises, they are simply made for real e-mountainbiking. The Zero Suspension System and the Forward Geometry work incredibly well, allowing the rider to perform the way he wants and pushing him to the next level.

The Crusher Carbon combines the most refined integrated carbon design, along with the best kinematics and geometry in its class, powered by the Shimano Steps E8000 system. The Crusher has it all and delivers extraordinary e-performance to the most ambitious riders, in any terrain and under all conditions. This is the future of true performance e-mountain biking, available today.
